

CarboNet SimpleFloc™

CarboNet SimpleFloc™ is an anionic, pre-hydrated flocculant that is dosed neat with no need for dilution or makedown to help streamline processes.

Simple always wins.

**Made with the NanoNet
chemical platform**

A powerful, proprietary library of nanoparticles made of a surfactant and specialty polymer to target and control specific contaminants in water.

TECH SPECS

Non-flammable, non-reactive, stable

Charge Density	-10
Molecular Weight	High
Specific Gravity	0.95 - 1.04
Bulk Viscosity (cP)*	5000 - 7000
pH	8 - 8.3
Storage Temperature (°F)	41 - 86
Shelf Life (Months)**	3 - 6
Appearance	Gel
Color	Milky white
Odor	Mild/Sweet
Freezing Point (°F)	32
Boiling Point(°F)	212

* Average values (measured at 30 rpm)

** When product is stored inside a building at a stable temperature of 30°C

CarboNet™
water treatment

CarboNet is a specialty chemicals company that works with the world's leading industrial brands to clean and recycle their wastewater. Using unconventional chemistry, we move industries and our planet towards a cleaner, brighter future.
